
coordinate of μ_2
$\mathcal{M}_+ :\ \mu_1 = \mu_2$
$\mu_1 = \mu_2 \simeq \mu_1^o$
(C) positive ambient curvature at $\mathcal{M}_-$ away from $\mu^\dagger$
(B) invariance / dissipation
coordinate of μ_1
(A) antipodal saddle $\mu^\dagger$
(E) positive ambient curvature near μ^o
(D) descent direction
$\mu_1 = \mu_2 \simeq -\mu_1^o$
$\mathcal{M}_- :\ \mu_1(A) = \mu_2(-A)$
